Chemistry 11500

Final Exam

Wednesday, May 7

7:00 pm

Elliott Hall of Music
(First Balcony)

New Topics (i.e., after Exam III)
- Organic Compounds and the Atomic Properties of Carbon (Chapter 15)
- Thin-Layer Chromatography
- Infrared Spectroscopy

Final Exam Breakdown
- Approximately five (5) questions having smallest number of correct answers from each of Exams I - III
- Approximately ten (10) questions from New Topics
- Approximately ten (10) general questions from entire semester

Keep in mind that homework, concept problems and lab experiments are still fair game for the final exam!
