Chemistry 11500

Lab Safety Certification

1. Using your Purdue Career account, log on to “Blackboard Learn”.

   http://www.itap.purdue.edu/lt/blackboard/

3. Click on the “Safety Tutorial” link and view the tutorial, which will load in a new window.

5. Read the instructions and answer the twenty-five (25) questions.

Instructions for the Safety Certification Quiz

You may refer to the “Safety Tutorial” and the safety policies that are included in your course packet or lab manual while answering the questions. Make sure that you save your answers and click Finish when you are done. A passing score is twenty (20) out of twenty-five (25) in one attempt. Note that you have unlimited attempts within the set time period to obtain a passing score. Confirm your score by clicking the My Grades tab in Blackboard.

Note that the safety certification must be completed and passed by 11:59 pm, Sunday, January 26, 2014. Beginning Week 3 (week of January 27), any student who has not successfully completed the safety certification will not be allowed to work in lab until after the safety certification has been successfully completed. Any lab that a student misses due to incompletion of the safety certification will be counted as an unexcused absence, and the student will receive a grade of zero for that lab.
