

I understand that

- a) no capped or closed containers are to be put into glass disposal boxes, and only glassware which is not contaminated with hazardous chemical
- b) any container given a TRIPLE RINSED sticker is to be triple rinsed (with water) before the sticker goes on.
- c) waste containers are to be closed AT ALL TIMES except when material is being transferred. "I just stepped away" is never the correct response to "why is this waste container not closed?" Close it before stepping away.
- d) to fail in these elementary waste management behaviors is to risk disciplinary action which could include time off without way and ultimately, termination from a paid position.
