Research and Development at DuPont

Empower the world with the essential innovations to thrive

We are seeking candidates who have earned an M.S. and/or Ph.D. in one of the following areas:

chemical engineering, materials science and engineering, polymer science and engineering, chemistry, electrical engineering, mechanical engineering

Make an Impact

Our researchers use innovative approaches to solve technical problems and deliver highly-specialized solutions at market speed.

Act like an Owner

We want risk-taking, adaptive, collaborative candidates. Our researchers must appreciate the details but still see the big picture.

Partner with Customers

Working closely with customers, we define, lead, and execute technical programs that deliver business value.

DuPont is an equal opportunity employer.
Legal right to work in the United States without restriction is required for M.S. candidates
