Postdoctoral Scholar Position

A postdoctoral position is available at the Stein Eye Institute, UCLA, to join our ongoing drug discovery efforts. We seek an independent and motivated individual with excellent organizational, interpersonal, and communication skills (both verbal and written). The successful applicant will work in a multidisciplinary setting with basic scientists and clinicians. While our laboratory’s focus is small-molecule drug development, the current projects aim to develop therapies for glaucoma, retinal neovascularization, and corneal disorders. As we are working at the interface of biochemistry, bioinformatics, cell biology, chemical biology, chemistry, computational biology, and systems pharmacology, we welcome candidates with different backgrounds to apply. Interested applicants should send their CV and names of three references to jzheng@jsei.ucla.edu.

The University of California is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, age or protected veteran status. For the complete University of California nondiscrimination and affirmative action policy see: UC Nondiscrimination and Affirmative Action Policy.
