

Reaction Task Cards

PROCEDURE

For each task card, the following tasks must be fulfilled:

1. List (on the corresponding data sheet) the number for each task card that is completed.
2. Write the full reaction from each task card using the correct formulas for both reactants and products.
3. Balance each reaction.
4. Classify each reaction using the following categories:
 - a. Synthesis
 - b. Decomposition
 - c. Single Displacement
 - d. Double Displacement
 - e. Combustion
 - f. Neutralization
